**FOR IMMEDIATE RELEASE**

**TouchTone Announces New Aggressive Flat Rate Pricing for its Dedicated Voice Services**  
*Interstate Rates \$0.0089 Per Minute – TDM and SIP-based Voice Connection Available*

**Whippany, NJ (February 15, 2010)** – TouchTone Communications, a full service telecommunications provider, is pleased to announce its new aggressive flat rate pricing for its dedicated voice services. TDM and SIP-based voice connections are available, and interstate rates start at \$0.0089 per minute.

“When we restructured our billing model we had wholesale pricing to the retail customer in mind,” said TouchTone’s Agent Support Manager, Steve Kaplan. “Not only are our rates aggressive, but Agents can be certain that their customers are always getting the same interstate and intrastate rates regardless of the day or time.”

Kaplan added, “Compared to other providers, we also have minimal requirements.”

TouchTone requires a low 70/30 RBOC/Non-RBOC traffic blend and bills in 6 second increments with a 6 second call minimum. There are no monthly recurring charges or contracts required (excluding local loops).

About SIP, Kaplan stated, “We offer customers the choice to either purchase bandwidth from TouchTone or through another ISP. This way, if the customer has an existing contract with another provider, they do not have to pay any early termination fees, but can still take advantage of our low flat rate pricing.”

SIP Trunking is one of many VoIP related services offered by TouchTone. SIP is an Internet based phone service that allows customers to make and receive calls using a data network instead of a standard phone line. This SIP-based VoIP solution allows businesses that have IP-capable phone systems to combine their voice and data onto one circuit, and can represent significant cost savings over a TDM platform.

“A typical business could easily save 40% or more on their monthly communications bill,” shared TouchTone’s VoIP Services Manager, Hosein Babai.

Trunks, or channels, are subscribed to according to the number of anticipated simultaneous calls a customer plans to make and receive at any given time, and can be added and removed as needed.

“Unlike many other companies, with TouchTone, no contract is required and no SIP Trunking fees apply,” continued Babai. “Plus, with TouchTone’s flat rate billing model, there are absolutely no surprises at the end of the month. It’s a win-win situation for both the Agent and the customer.”

To learn more about TouchTone’s telecommunication services or the company’s Agent Program, please call 1-800-900-5474 or e-mail [agents@touchtone.net](mailto:agents@touchtone.net).
